

Do you ever just like...feel sad?

Yeah, like all the time.

It usually just leads me
to start going through a
list of my family and
friends and asking
myself....

...if that person dies
would I even care? It
gets pretty depressing.

So I just eat some of my happy pills
and it makes it all better again.

But these are just M&M's.

Yeah. I can't afford
real medicine.
